CHOP TOP KIT

Tried and True easy way to chop a **1953-55**.
Top is wider and longer, proportioned correctly for the chop.
Rear window is proportioned perfect, not just a tiny slit.
Windshield is made specifically for this chop, not just a stock
windshield cut down, a mold was produced so the windshield
would fit correctly, no binding, no cutting 3 or 4 just to have it
break the first time the cab flexes.

NOTE: The kit above is for a 1953-55. For 1956 we
have a chop-top fiberglass roof as well. The 56 side win-
dows are an easy chop as they come straight down, the
rear window is the same, and we offer both sides and
rear in limo-dark, smoke, tint and clear.
